

## Ideation Phase

### Define the Problem Statements

|               |                                                                               |
|---------------|-------------------------------------------------------------------------------|
| Date          | 04 July 2026                                                                  |
| Team ID       |                                                                               |
| Project Name  | Optimizing User, Group, and Role Management with Access Control and Workflows |
| Maximum Marks | 2 Marks                                                                       |

#### Customer Problem Statement :

A customer problem statement helps identify the challenges faced by users while managing access, permissions, and security within an organization. It enables the project team to understand the users' needs and design an efficient ServiceNow solution that improves user management, access governance, workflow automation, and overall system security.

|                            |                                                                                                               |                                                                             |
|----------------------------|---------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------|
| <b>I am</b>                | <small>Describe customer with 3-4 key characteristics - who are they?</small>                                 | Describe the customer and their attributes here                             |
| <b>I'm trying to</b>       | <small>List their outcome or "job" the care about - what are they trying to achieve?</small>                  | List the thing they are trying to achieve here                              |
| <b>but</b>                 | <small>Describe what problems or barriers stand in the way - what bothers them most?</small>                  | Describe the problems or barriers that get in the way here                  |
| <b>because</b>             | <small>Enter the "root cause" of why the problem or barrier exists - what needs to be solved?</small>         | Describe the reason the problems or barriers exist                          |
| <b>which makes me feel</b> | <small>Describe the emotions from the customer's point of view - how does it impact them emotionally?</small> | Describe the emotions the result from experiencing the problems or barriers |

| Problem Statement (PS) | I am (Customer)                   | I'm trying to                                                                                         | But                                                                                        | Because                                                                                         | Which makes me feel                                                                         |
|------------------------|-----------------------------------|-------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|
| PS-1                   | A ServiceNow System Administrator | Manage users, groups, and roles efficiently while ensuring secure access to organizational resources. | Manual user provisioning and permission assignment are time-consuming and prone to errors. | Multiple users require different access levels, and maintaining security manually is difficult. | Concerned about security risks, administrative workload, and maintaining proper governance. |

|      |                  |                                                                                                    |                                                                                                              |                                                                                                          |                                                                             |
|------|------------------|----------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------|
| PS-2 | A Project Manage | Ensure that team members receive the correct access to perform their assigned tasks without delays | Access requests and approvals often require manual intervention and consume significant administrative time. | Delayed access affects project productivity and increases the risk of incorrect permission assignments . | Frustrated by inefficiencies and the lack of streamlined access management. |
